PROFESSIONAL GRADE SOFT TOUCH® FITOVER FRAMES

The Cocoon collection features unique design elements not found in any other fitover sunglasses. Designed to fit comfortably and securely over 99.5% of all prescription eyewear frames, the patented OverRx® designs are engineered to deliver unparalleled protection from damaging UV light and harsh glare. Integrated brow and underside protection eliminate reflected light from above and below. Injected polycarbonate side shields block peripheral light without compromising the wearer's range of vision. The Soft Touch® frame collection features a velvety smooth, matte finish that enhances comfort and provides a subtle appearance.

HIGH PERFORMANCE MIRRORS REFLECT INTENSE GLARE

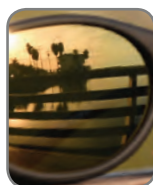

Cocoons scratch-resistant Polare® lenses are available with a variety of optional high performance mirror coats developed to maximize the polarization efficiency of the lens system. The micro-thin, metallic layer enhances the glare cutting properties of the base lens by creating a more reflective outer lens surface. Polarized lenses enhanced with a reflective mirror coat are extremely effective in eliminating the intense surface glare encountered when participating in activities where light levels are extremely bright, such as snow and water sports.

Mirrored lenses are available in all fitover sizes with select lens tints and frame finishes.

DESIGNED TO BE WORN OVER PRESCRIPTION EYEWEAR

Vistana defines the new standard in OverRx sunglass design. Proprietary Dynamic Base Lens Technology™ (DBT) is applied to the Polaré® lens system to provide maximum peripheral vision and complete protection from all angles without the use of independent side shields. This patented design feature provides a crystal clear, uninterrupted panoramic line of sight that is not possible with traditional over prescription sunglasses. The Flex2Fit® adjustable temples allow each wearer to contour the ear pieces for an exact fit that is extremely comfortable and secure during extended use. Each pair of Vistana includes a soft protective case, large microfiber lens cloth and a manufacturer's limited lifetime warranty.

Cocoons Clip-Ons and Flip-Ups feature a broad spectrum of lens tints designed to deliver convenient and effective protection from damaging UV and glare. The professional grade, scratch resistant Polaré® polarized lens system instantly transforms standard prescription eyewear into glare-cutting sunwear. Select sizes are available with non-polarized, high-contrast, high light transmission lemon tinted lenses designed to reduce glare and sharpen object definition in low light conditions. All lenses provide optical grade clarity, filter 100% of damaging UVA/B rays, and are backed by a one year manufacturer's warranty.

Cocoons Clip-Ons feature a spring activated stainless steel bridge that allows the wearer to effortlessly and securely attach the clip-ons to a variety of prescription eyewear frames. The wide range of shapes and sizes provides a diverse selection designed to fit almost any prescription eyewear frame.

IMPROVE VISUAL ACUITY WITH FITOVER FILTERS

Low Vision CocoonS offer a full spectrum of filters designed to enhance contrast and/or reduce glare for those with low vision impairments. The integrated side shields are precisely regulated to match the exact transmission rates and UV absorption curves of the front filters. As with all Polaré® lenses, the filters are protected by a one year scratch resistance warranty.

The patented frames feature Flex2Fit® temples and a unique Soft Touch® finish to enhance comfort during extended wear. The adjustable temple system enables the wearer to manually contour the ear pieces for a personalized fit that is extremely secure with a minimal amount of temple pressure. All frames feature a limited lifetime warranty and include a custom designed case and lens cloth.

REDUCE EYE FATIGUE FROM ARTIFICIAL LIGHTS

Cocoons fitover night driving eyewear features the Twilight lens system designed to block 100% of harmful UV light and 60% or more of harmful High Energy Visible (HEV) blue light, while providing 93% overall visible light transmission. The unique filtering properties of these HEV filters effectively reduce scattered blue light and improve contrast without compromising overall light transmission. The lens system is highly scratch resistant. Limiting the amount of HEV exposure allows the eyes to remain relaxed, focused, and free from the fatigue that can result from extended exposure to halos and artificial LED light sources. The lenses are protected by a one year scratch resistance warranty and include an anti-reflective coating to minimize glare and halos created by artificial light sources.

The patented frames feature Flex2Fit® temples and a velvety Soft Touch® finish to enhance comfort during extended wear. The adjustable temple system enables the wearer to manually contour the ear pieces for a personalized fit that is extremely secure with a minimal amount of temple pressure. Each pair includes a limited lifetime warranty, custom designed case and lens cloth.

INCLUDED ACCESSORIES
Neoprene Case & Dura Cloth

Without Twilight® Filters

Blurry halos and glare can obstruct vision and create unwanted eyestrain.

With Twilight® Filters

Glare and halos from oncoming headlights are reduced. Contrast is improved.

ALLEVIATE DIGITAL EYESTRAIN & IMPROVE SLEEP

Cocoons fitover computer eyewear, featuring a specially formulated HEV blue light filter system, prevents over exposure to artificial High Energy Visible (HEV) blue light that can contribute to Digital Eyestrain and Computer Vision Syndrome (CVS). Limiting the amount of HEV exposure allows the eyes to remain relaxed, focused, and free from the fatigue and blurred vision that can result from extended exposure to digital screens. Prolonged and cumulative exposure to HEVs can lead to disruption of circadian rhythms (sleep/wake cycle), potential eye problems, such as age-related macular degeneration, and unnecessary headaches. The lenses are protected by a one year scratch resistance warranty and include an anti-reflective coating to minimize glare and halos created by artificial light sources.

The patented frames feature Flex2Fit® temples and a velvety Soft Touch® finish to enhance comfort during extended wear. The adjustable temple system enables the wearer to manually contour the ear pieces for a personalized fit that is extremely secure with a minimal amount of temple pressure. Each pair includes a limited lifetime warranty, custom designed case and lens cloth.

SIDEKICK

LOW
VISION

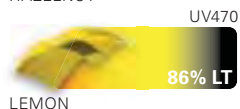

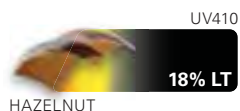

FEATURES

NON-POLARIZED PC
UV400 PROTECTION
SCRATCH RESISTANT
CONVENIENT FLIP DESIGN
ULTRA LIGHTWEIGHT
LIFETIME WARRANTY

Unlike contemporary flip-up designs, Cocoon SideKick features wrap around lenses that offer the wearer additional protection from both the peripheral line of sight and from light that enters from above. With these revolutionary improvements in flip-up design, the majority of light is now filtered through the UV absorptive filters or blocked by the brow bar. All SideKick models are available in Lemon, Boysenberry, Orange, Hazelnut and Smoke absorptive filters.

POLARE[®] FILTERS

General purpose absorptive filter great for indoor and outdoor use, reduces glare to provide improved visual acuity. Transmits 15% of visible light and provides 100% UVA/UVB protection. Blocks 90% of blue light and all visible light up to 410 nm.

Reduces glare and provides heightened contrast in outdoor and indoor applications. Transmits 18% of visible light and provides 100% UVA/UVB protection. Blocks 98% of blue light and all visible light up to 410 nm.

Maximizes brightness and enhances contrast in low light conditions to improve visual acuity. Transmits 86% of visible light and provides 100% UVA/UVB protection. Blocks 40% of blue light and all visible light up to 470 nm.

Enhances contrast by intensifying backgrounds to improve object definition and object clarity. Transmits 34% of visible light and provides 100% UVA/UVB protection. Blocks 100% of blue light and all visible light up to 520 nm.

General purpose absorptive filter designed to reduce light intensity and provide true color definition. Transmits 15% of visible light and provides 100% UVA/UVB protection.

(FLASH SILVER MIRROR)

FEATURES

VENTED ANTI-FOG DESIGN
DUAL-LAYER LENS SYSTEM
SCRATCH RESISTANT
UV400 PROTECTION
FLASH MIRROR COATING
ANTI-FOG COATING
ADJUSTABLE HEAD STRAP
MICROFIBER POUCH INCLUDED
5 YEAR WARRANTY

DESIGNED FOR PEAK PERFORMANCE IN COLD WEATHER

Cocoons fitover (OTG) goggles are designed to deliver peak visual acuity and maximum UV protection in cold weather conditions. The high contrast orange lens with flash mirror coating is a "blue attenuator" that combines the removal of blue light with amplified levels of high spectrum colors to deliver enhanced visual performance in the presence of intense glare.

The dual-layer lens combined with an anti-fog coat and vented frame design eliminates condensation build up, keeping the lenses crystal clear while sheltering the eyes from damaging UV light, wind, sleet and other elements encountered in cold weather sporting conditions. Cocoons fitover goggles include a large microfiber pouch and a 5 year warranty.

POLAR[®] DUAL-LAYER LENS SYSTEM

- Dual-layer lens design eliminates condensation
- Anti-fog coating on internal lens
- UV400 protection filters out damaging UVA & UVB rays
- Orange "blue attenuator" tint sharpens contrast
- Flash silver mirror coat eliminates glare
- Transmits 40% of visible light, blocks 75% of blue light

FEATURES

NON-POLARIZED PC
UV400 PROTECTION
SCRATCH RESISTANT, ANTI-FOG
ANSI Z87.1 IMPACT RATING
NON-SLIP NOSE PADS
LIGHTWEIGHT, DURABLE FRAME
LIFETIME WARRANTY

LightGuard® delivers numerous features at a very economical price. The collection's versatility and value makes it an ideal solution where eye protection and specialized tints are required. Both the OverRx® and sport inspired Wrap frames are designed to provide 360° of UV Protection®, completely isolating the eyes from 100% of harmful UVA and UVB rays. All models exceed the high impact protection requirements of ANSI Z87.1 and are constructed from extremely resilient, but lightweight impact resistant polycarbonate. All LightGuard eyewear features a chemically bonded anti-fog lens treatment to ensure crystal clear optics at all times.

DESIGNED TO BE WORN OVER PRESCRIPTION EYEWEAR

SIZING GUIDE: To select the correct OverRx frame size, place the prescription eyewear frame face down on the image of each size. If the eyewear frame fits within the blue box, the specified size will accommodate the eyewear frame. If the frame exceeds the blue box, then you must try the next size up. The ideal fit will come from the size that is just slightly larger than the prescription eyewear frame front.

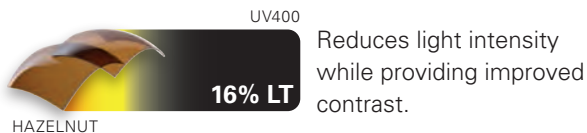

LIGHTGUARD[®] MEDIUM (M)

Fits over frames up to 5 ³/₈" w x 1 ³/₄" h (136 mm x 44 mm)

LIGHTGUARD[®] LARGE (L)

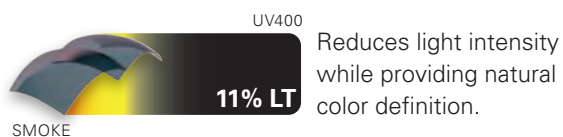

Fits over frames up to 5 ¹/₂" w x 2" h (140 mm x 50 mm)

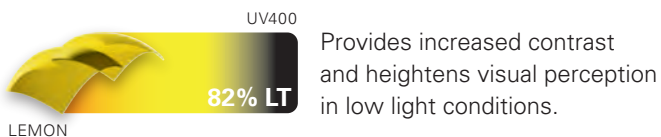

UV400
Reduces light intensity while providing improved contrast.

UV400
Provides extreme contrast enhancement with minimal visible light reduction.

UV400
Reduces light intensity while providing natural color definition.

UV400
Provides increased contrast and heightens visual perception in low light conditions.

*In addition to the above tints, all Lightguard models are available in clear.
